INSIDER

New cases:

New
deaths

The New York Times has found that official [tallies in the United States](#) and [in more than a dozen other countries](#) have undercounted deaths during the coronavirus outbreak because of limited testing availability.

Where new cases are increasing

These states have had recent growth in newly reported cases over the last 14 days, in part because some have recently ramped up their testing capacity. The White House released [criteria for states to reopen based on a “downward trajectory”](#) of cases over the last 14 days, though it did not define how to measure the trajectory. Scales are adjusted for each state to make the curve more readable.

Where new cases are mostly the same

Up-to-date information on coronavirus is available for free.

EXPAND

The figure displays a grid of 16 line charts, each representing the daily new COVID-19 cases for a specific US state or D.C. The charts are arranged in two rows of eight. Each chart shows data from March 1 to June 11, 2020. A red line represents the daily new cases, a thicker red line represents the 7-day average, and a light red shaded area represents the last 14 days. The total number of cases for each state is listed above the chart.

State	Total Cases
New York	385,669
New Jersey	165,816
Illinois	131,731
Massachusetts	104,667
Pennsylvania	81,944
Maryland	60,823
Virginia	52,647
Connecticut	44,461
Ohio	40,004
Indiana	39,714
Minnesota	29,347
Colorado	28,632
Wisconsin	22,049
Nebraska	16,315
Rhode Island	15,862
Delaware	10,106
Washington, D.C.	9,589
South Dakota	5,665
New Hampshire	5,209
North Dakota	2,983
Maine	2,667
West Virginia	2,217

In late February, there were just a few dozen known cases in the United States, most of them linked to travel. But by late spring, the virus had torn through every state, infecting more people than the combined populations of Montana and Vermont, and killing more Americans than can fit in an N.F.L. stadium. Despite some progress, new hotspots continue to emerge and hundreds more people are dying each day.

[See our live coverage of the coronavirus outbreak](#) for the latest news.

American life has been fundamentally reordered because of the virus. Concerts, parades and baseball games have been called off. Unemployment claims have spiked. Some governors have imposed quarantine requirements on Americans who cross state lines. And even as states reopen, officials have warned that the virus was likely to remain a persistent threat.
